

Week 1: Earning

Name: _____

Date: _____

Liam wants to save \$350 for computer parts. These are the jobs he does to earn money:

- Work at a tech shop for 6 hours, earning \$12.50 an hour
- Work at a library for 8 hours, earning \$16 for each hour
- Tutoring for \$16 an hour until he has enough to buy the computer parts

How many hours of tutoring does he need to do to earn enough for the computer parts?

Find all the correct answers based on the original problem:

- Liam earned \$75 at the tech repair shop.
- Liam saved a total of \$215 before he started tutoring.
- Liam needs to tutor for 10 full hours to reach his goal.

Liam has his \$350 ready, but he discovers that shipping the heavy computer tower costs an extra \$24. He also decides he wants a gaming mouse that costs \$36.

What jobs can he do to earn the extra money?
